CAREER OBJECTIVE

Third-year undergraduate in Computer Science & Artificial Intelligence at Helwan University, actively building practical skills in React.js and the MERN stack alongside a solid foundation in OOP, data structures, and algorithms. Delivered four independent university projects spanning web and desktop development, including self-taught problem-solving under a live team deadline. Seeking a Junior Front-End or MERN Stack Developer role to apply hands-on coding ability and a fast, self-directed learning curve to real production work.

EDUCATION

B.Sc. in Computer Science & Artificial Intelligence — AI Program Expected 2028

Faculty of Computers and Artificial Intelligence, Helwan University

Currently in 3rd year | GPA: 3.13 / 4.0 (Very Good)

SKILLS

- **Programming Languages:** C, C++, Java, Python
- **Web Development:** HTML, CSS, JavaScript, PHP
- **Currently Learning:** React.js, Node.js, Express.js, MongoDB (MERN Stack)
- **Database:** SQL
- **Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms
- **Computer Skills:** Microsoft Office (Word, PowerPoint, Excel)

PROJECTS

Restaurant Management System | *Java · GUI · File Handling*

University Project — Team of 6

- Designed and built a desktop GUI application in Java to manage restaurant orders and table assignments for a 6-member team project.
- Independently researched and implemented file handling and dynamic table-based order display after the team hit a technical blocker, delivering a working feature the rest of the group built on.

Car Agency Website | *HTML · CSS · JavaScript*

University Project

- Developed a fully functional car agency website with an interactive front-end using HTML, CSS, and JavaScript.

CPU Scheduling Comparison | *Operating Systems · Web*

University Project

- Built a web-based visualization tool comparing three CPU scheduling algorithms — Round Robin (RR), Shortest Job First (SJF), and Shortest Remaining Time First (SRTF) — to demonstrate process scheduling behavior.

Virtual Career Fair | *Software Engineering · Team Project*

University Project

- Contributed to the design and development of a virtual career fair platform as part of a team, applying software development methodologies and system analysis.

COURSES & CERTIFICATES

- Introduction to Artificial Intelligence — Oracle

LANGUAGE SKILLS

- **Arabic:** Native
- **English:** Good
